Motivation Letter

Position: Chairperson of training committee

Dear Executive Committee and Delegate,

It gives me immense pleasure to be part of the IADS family, to be an active hardworking member. I, as a trainee in the beginning, was devoted to improve my own skills, to effectively speak out and engage with others. Now, being a trainer, I seek to ameliorate the new trainees’ capabilities and to make new trainers. I find myself more committed, more responsible, more fortunate and determined to convey the message I was taught to others.

The knowledge and inspiration that my experience has given me strongly motivates me to be the chairperson in the training committee of IADS, to act as a responsible youth in enhancing the skills of new trainers.

Today, I believe that as young people we courageously play a key role in improving the association and in increasing its impact on dental students. We want to go that extra mile in building more self-confident, outspoken, and courageous dentists who are great at presenting their ideas to others.

I am completely heatedly willing to accept and relish the challenges and responsibilities required. Only together in the spirit of cooperation, can we build on the achievements of the past and tackle the challenges of the future. This way we ensure the contribution and continuation of a strong and flourishing dental society, representing the interests and visions of the IADS.

Finally, I hope you find me worthy enough for such a position as I seek to achieve the goals of the training committee.
